

When You Repair Victor Application Server You Must Uninstall Then Reinstall the Most Recent Service Pack

Article ID: SWH-KB-nID- 000034643

Published: Jan-25-2023

Problem

After running a repair of Victor Application Server, the services may not start, or the system may behave unexpectedly. This can be caused by the repair process replacing updated files from a Service Pack with the original files.

Solution

If a newer Service Pack is available, you can install that. If not, uninstall any Critical Updates installed and then uninstall the most recent Service Pack installed. Then reinstall the Service Pack and any Critical Updates you removed.
